EXHAUST SOLUTIONS

Installation-Ready Exhaust Systems

The flexibility to get the most out of any boiler

Cleaver-Brooks installation-ready boiler exhaust systems are more than the sum of their interchangeable male and female parts. They are complete solutions that provide the latest technology to enhance the performance of your boiler. Our CBI insulated exhaust systems are perfect for venting gases from liquid, oil, or solid fuel-fire boilers. Ranging from 6 to 48 inches in diameter, they are ideal for industrial and commercial applications.

Features:

- Exclusive, male/female jointing system eliminates the need for adapters, reducing installation time by up to 40%
- State-of-the-art laser cut and welded joints provide accurate fit and adherence to specifications
- Stainless steel material provides superior protection from corrosion and staining, and increases exhaust lifespan
- A full range of accessories ensures your exhaust system is customized for your application
- UL/ULC listed

Freestanding Stacks

Engineered to excel in the most demanding sites

Cleaver-Brooks manufactures freestanding stacks for customers with the most demanding applications. These systems are not only manufactured to American and Canadian standards and requirements, they're engineered to meet Cleaver-Brooks standard of perfection.

Our in-house engineering department will create the most efficient solution – no matter how demanding the application or type of boiler system employed. Designs are based on exhaust combustion products, thermal and chemical conditions, corrosion effects, structural analysis, seismic calculations, and vortex-induced load analysis. Our team will propose the appropriate composition, shape, and jointing method for your specific application, using the latest technology in combustion gas venting.

Features:

- Factory-welded joints provide strength, and avoid costly third-party welding
- Available in carbon steel, COR-TEN® steel or stainless steel configurations, as required by your installation's needs
- High-temperature insulation provides protection from the extreme heat associated with exhaust stacks
- Metal jacket is available as an option when required
